Indexes to Volume 2 (1983)

Subject Index

Acetylene terminated fluorenone and its use with fluorenone polyesters, 37
Adsorption of plasma proteins on poly(hydroxyalkyl methacrylate) materials, 605
Algebraic evaluation of some important angular values for ion erosion, 249

Bidirectional torsion and dynamic recovery in aluminium–zinc–silicon alloy, 3

Calculation of solid–liquid interfacial tension in metallic systems from contact angle data. On the, 197
Cation distribution and cystal anisotropy in $MgFe_2O_4$, 363
Cavitation in high purity aluminium during fatigue at elevated temperatures, 522
Cohesion and semiconductivity in molecular (organic) solids, liquids and monomers, 307
Comments on "The geometry of melt spun ribbon", 88
Compact shear test specimen. A, 663
Comparison of r.f. sputtered zinc oxide thin films on nonpiezoelectric substrates, 789
Compressive strength of jute–glass hybrid fibre comsites, 99
Concentration and stress dependence of the activation volume for plastic flow in b c c solid solutions, 713
Controlled interfacial bonding on the strength and fracture toughness of Kevlar and carbon fibre composites, 723
Copious whisker growth on copper scale, 383
Crack growth in vitreous silica under dynamic loading, 388
Creep of silicon carbide fibres. The, 80
Crystal structure in new $La_{1-x}Nd_xTlO_3 (0.0 \leqslant x \leqslant 1.0)$ system, 753
Crystallization of amorphous Si_3N_4 prepared by the thermal decomposition of $Si(NH)_2$, 275
Crystallization of $Fe_{67}Co_{18}Si_1B_{14}$ metallic glass. On the, 499
Cubic ⇌ tetragonal equilibrium in the system zirconia–scandia at 1800° C: effect of alumina. The, 561

D.C. breakdown studies on SnO_2 films, 347
Dark and photoconduction in azo dyes, 149
Decay behaviour of $NaYF_4:Gd^{3+}$ phosphors, 296
Decay of X/r-ray induced luminescence in BaFCl crystals, 761
Determination of the electrical conductivity of the single phase of a β-sialon $Si_{6-z}Al_zO_zN_{8-z}$ with $z = 2$, 299
Determination of the threshold-displacement energy in α-Al_2O_3 by high-voltage electron microscopy, 453
Dielectric and pyroelectric properties of doped triglycine sulphate crystals, 243
Dielectric constant and loss of polysulphur nitride in the microwave region, 727
Dielectric properties of anhydrous and hemihydrated lanthanum iodates, 638
Dielectric properties of cobalt phthalocyanine, 22
Difference between bending and tensile strength of cracked brittle material, 115
Diffuse reflectance spectra of mono-cadmium and di-cadmium stannates. The, 505
Direct observation of sintering of VAD soot particles by hot stage scanning electron microscopy, 245
Direct observations of crack propagation in brittle materials, 613
Direct observations of the failure and toughness of hybrid composites, 617
Domain structures in amorphous and microcrystalline $Fe_{90}Zr_{10}$ alloy studied by Lorentz electron microscopy, 54
Ductility of the superplastic Pb–Sn eutectic at room temperature, 63
ΔE effect of polycrystalline Ni–Zn ferrites, 625

Effect of CuO addition on the electrical and dielectric properties of semiconducting barium titanate ceramics, 403
Effect of decomposition on the thermal shock behaviour of Mg-CSZ. The, 279
Effect of ferrite and pearlite distribution on fracture toughness in nodular cast iron, 737
Effect of grain boundary scattering on the TCR of thin tin films, 360
Effect of grain size on ductility in the superplastic Pb–Sn eutectic. The, 337
Effect of hydrogen attack on the strength of high purity copper, 1
Effect of hydroxyl ions on the thermoluminescence in irradiated LiF:Mg crystals, 39
Effect of iron, aluminium, calcium on the vitrification of grain-boundary phases in nitrogen ceramics. The, 19
Effect of low-temperature annealing on the structure of $Cu_{57}Zr_{43}$ glass, 153
Effect of magnesia additions on the reaction sintering of zircon/alumina mixtures to produce zirconia toughened mullite, 772
Effect of magnetic fields on the thermal decomposition reactions of inorganic hydroxy-compounds. The, 33
Effect of molybdenum in type 316 stainless steel on grain boundary self-diffusion and creep rate at low stresses. The, 146
Effect of oxidation curing polycarbosilane fibre on tensile strength of coreless SiC fibre, 769
Effect of precipitation heat treatments on the critical temperature in Ti-rich Nb–Ti alloys. The, 425
Effect of quenching on I–V dipoles in KCl crystals, 719
Effect of simulated body environments on crack propagation in alumina, 215
Effect of soaking times on the mechanical properties of rapidly solidified aluminium alloys. The, 67

0261–8028/83 $03.00 + .12 © *1983 Chapman and Hall Ltd.*

Effect of solvent-washing on electrical resistivity of copper–phthalocyanine oligomer (tetramer), 77
Effect of the type of pre-torsional deformation on the creep rate of a silver–copper alloy, 144
Effect of ZrO_2 (SS) in mullite on the sintering and mechanical properties of mullite/ZrO_2 composites, 599
Effects of defect character on hydrogen diffusion in metals, 475
Elastic constants of ammonium pentaborate, 629
Electrical conduction in amorphous titanium nitride films, 694
Electrical conduction in copper tungstate, 623
Electrical conductivity measurements of stannic iodide, 12
Electrical conductivity of thin metal films grown in a columnar fashion, 579
Electrical properties of nickel–phthalocyanine, 71
Electrical properties of polystyrene doped with leucomalachite green for correlation with its electrothermographic behaviour, 397
Electrical properties of $SrFeO_{3-\delta}$ under various partial pressures of oxygen, 665
Electrical pulse breakdown in magnesium oxide capacitors, 573
Electrical transport properties of iron (II) tungstate, 808
Electrolytic growth, electrical conductivity and magnetic susceptibility of stannous iodide, 463
Electrophotographic characteristics of CdSSe(Cu) in polystyrene binder layers, 17
ESCA study of amorphous CVD Si_3N_4–C composites, 805
Estimated immiscibility isotherms of Li_2O(or Na_2O)–Rb_2O(or Cs_2O)–SiO_2 glasses, 42
Estimation of free energy of formation of $Mg_3V_2O_8$ between 298 and 1200 K, 137
Estimation of T_0-curves from existing phase diagrams, 444
Evolution of an unusual superparamagnetic Mössbauer resonance in iron-containing oxide and silicate systems. The, 317
Examination of M_7C_3 carbides in high chromium cast irons using thin foil transmission electron microscopy, 428
Excess solubility of cadmium in gold by rapid solidification, 259

Fatigue initiation in a short glass fibre composite, 7
Flux growth of some simple and complex oxides. The, 285
Flux growth of some transition metal phosphates. The, 511
Fractography of a dual phase steel, 94
Fracture mechanics analysis of indentation-induced Palmqvist crack in ceramics. A, 221
Fracture morphology of rubber compounds containing recycled rubber powder, 422
Fracture toughness of irradiated polyethersulphone, 267
Frequency response of the effective resistance of thin palladium and manganese films. The, 207
Frictional wear of polytetrafluoroethylene (PTFE), 777

Grain boundary sliding at high temperatures in torsional fatigue, 25
Growth and X-ray study of $NaYF_4$ crystals, 83
Growth of Cu_2S on polished or etched single crystal CdS substrates. The, 229

Hardness of dense β-Si_3N_4, 657
Hot isostatic pressing of coal-derived asphaltenes, 173
Hot-rolled silicon carbide–aluminium composites, 119
Hydrogen induced delay failure of AISI 316L and 321 types stainless steels, 602

Identification of thin epitaxial films of Cu_2O of TEM specimens of a Cu–Ni–Ti alloy, 15
Image processing of SEM micrographs of integrated circuits for defect location, 565
Induced anisotropy in Cu–Ni–Co alloy, 332
Influence of ageing on changes in coercivity and in the mechanism of decohesion of CuNiFe permanent magnet alloy. The, 407
Influence of iron concentration and particle size on the ESR linewidth of Al_2O_3:Fe^{3+} powders, 210
Infrared absorption spectroscopy of zinc borate and vanadium borate glasses, 649
Initial study of fracture in wide amorphous metal tape. An, 375
Interface stability in vacuum infiltrated stainless steel and nichrome reinforced aluminium composites, 553
Intermetallic compound formation in the Ni_3Ta–Ni_3Mo section of the Ni–Ta–Mo system, 583
Internal friction in cobalt–zinc ferrites, 587
Internal stresses in austenitic steels cathodically charged with hydrogen, 63
Interpenetration twinning in gel-grown gypsum single crystals, 705
Intrinsic brittle/ductile criterion. The, 295

Lattice imaging of high modulus poly(*p*-phenylene benzobisthiazole) fibres, 54
Lattice thermal expansion of hydroxyapatite. The, 577
Lattice thermal expansion of Nb_3Os, 171
Lattice thermal expansion of silver metaperiodate, 169
Liquid phase sintering of tungsten, 480
Load bearing capacity on TiN coated WC–Co cemented carbides, 419
Long term durability of stressed GRP in acidic environments. The, 519
Low temperature cobaltite formation using mixed metal oxalate hydrazinate precursor, 272

Magnetic anisotropy of Cr_5Te_8 single crystal, 441
Magnetic susceptibility of $La_{1-x}Nd_xTlO_3$ system ($0.0 \leqslant x \leqslant 1.0$), 163
Magnetic susceptibility study of 3d transition metal molybdates of the type $L_2(MoO_4)_3$, 747
Mechanical properties of metal/polymer composites, 201
Mechanical strength of LEC Ge-doped single crystal InP, 667
Mechanism of stress corrosion of E-glass fibres. On the, 415
Mechanochemical effect of dry-grinding on the transformation phenomenon from γ-Fe_2O_3 to α-Fe_2O_3, 129
Metallic interactions in dioxides with rutile and rutile-related structures, 558

Methods for analysing the experimental data of Ostwald ripening, 291
Micromorphology of an injection moulded thermotropic liquid crystal polymer. The, 733
Microstructure of semi-crystalline thermoplastics structural foams, 195
Mixture rule for strength of fibre reinforced cements. On the, 527
Modification of the spinodal hardening in a Cu–9 wt % Ni–6 wt % Sn alloy by 0.1 wt % silicon or aluminium addition, 233
Mössbauer investigation on SiO_2–Fe_2O_3 glasses obtained from gel, 467

Nature of craze development and breakdown during fatigue. On the, 325
Negative temperature coefficient of resistivity of thin metallic wires, 775
New method of the calculation of the hydrogen trap activation energy in metals. A, 538
New relationship of d.c. conductivity with loss modulus in PET. A, 183
Note on plasticity of glass. A, 703

Observations of cyclic grain boundary migration in aluminium after large numbers of fatigue cycles, 180
Observations on inclusions and acicular ferrite nucleation in submerged arc HSLA welds, 123
On some structural problems in $Fe_{80}B_{20}$ (2605) metallic glass, 645
One possible explanation for the α^* relation in non-crystalline materials, 590
Optical absorption edge of amorphous thin films of borosilicate glass. The, 535
Optical absorption edge of amorphous thin films of silicon monoxide and of silicon monoxide mixed with titanium monoxide. The, 350
Optical absorption of nickel(II) and mixed-alkali effect in K_2O–Li_2O–B_2O_3 glasses, 697
Optical absorption of transition metal ions in silica coating films prepared by the sol–gel technique, 395
Optical properties of cadmium zinc phosphate glasses. The, 660
Optical properties of oxide glasses containing nickel microgranules, 329
Order disorder transition in Fe–Cr σ-phase, 283
Oxidation resistance and hardness of some transition metal silicides. The, 609

Peak amplitude distribution of AE events observed during thermal shock fracture of refractories, 593
Perfection of (1 1 1)-oriented crystallites of aluminium. The, 341
Phase change clathrate materials for energy storage, 681
Phase change of WO_2, 353
Phase equilibrium in the $K_2O \cdot V_2O_5 \cdot 2TeO_2 \cdot V_2O_5$ system, 541
Phase transformations in a Ti–2 wt % Cr alloy on cooling, 715
Photoconduction in anodic Al_2O_3 films in the (3.0–6.2) eV range, 570
Photovoltaic effect in sensitized crystal violet dyes, 433
Plasma-sprayed silicon as a possible base material for the production of low cost solar cells, 490
Post-irradiation deformation of Mn-doped KCl – a thermoluminescence study, 549
Potential-dependence of oxide film composition on Fe–Cr–Ni alloys in elevated temperature solutions, 304
Preferential and non-preferential etchants for $ZnSnAs_2$, 710
Preparation and characterization of BaS phosphors, 106
Preparation of $MnCo_2O_4$ by a wet method and its metal ion distribution, 525
Preparation of rapidly solidified ribbons with second phase particles, 495
Properties of sintered 2014 aluminium alloy composite containing WC, 801

Quantitative electron microscope study of ceramic kaolins, 781
Quasi-ferromagnetism in antiferromagnetic $GdVO_4$, 161

Random variation of stress concentration factors in fibrous composites. The, 385
Rapid heating of Fe–Si–B metallic glasses, 729
Reaction sintering (RS) of mixed zircon-based powders as a route for producing ceramics containing zirconia with enhanced mechanical properties, 366
Reactivity in the spinel formation reaction in CuO/Al_2O_3, Fe_2O_3, Cr_2O_3 systems, 393
Relationship between grain boundary segregation and heat-treatment parameters in an aluminium alloy, 485
Release of organic species from the glass–ionomer cements. The, 224
Reply to 'Comments on "The evaluation of the activation energy for superplastic flow"', 45
Resistivity dependence of the minority carrier diffusion length in single crystals of Cu_2O, 691
Resonance Raman spectroscopic study of the strength of the bonding between an epoxy resin and a polydiacetylene fibre. A, 263
Rhombohedral phase produced in abraded surfaces of partially stabilized zirconia (PSZ), 91
Role of impurities in the electrical conductivity of zinc phosphide, 132
Role of impurity dispersion in NaCl:Ca^{2+} in microhardness and thermoluminescence. The, 670
Role of impurity precipitates in microhardness of NaCl:Sr^{2+} crystals, 400
Role of microcracking during crack growth in brittle materials. The, 204
Role of the liquid in environmental stress cracking of polyethylene. The, 28
Role of the substrate on the growth habit of the polymer crystals. The, 103

SeO_2–TeO_2 phase diagram, 635
SEM observations of the initiation and propagation of cracks in a short fibre-reinforced thermoplastic composite under stress, 188
SEM study of fracture in an Al–Al_2O_3–MgO cast particle composite, 750
Shock compaction of TiN–TiC powders, 673

Silicate anion constitution of $Li_2Ca_4Si_4O_{13}$ and $Li_2Ca_2Si_3O_{13}$, 355
SIMS profile analyses for Ge-, Co- and Fe-doped InP substrates used in epitaxial growth, 309
Sinterability of alkoxide-derived magnesia, 503
Solid solution of TiO_2 in mullite, 185
Some further factors affecting the solubility of silicate cements, 191
Some properties of sintered Al_4C_3, 675
Spectroscopic study of some borate and vanadate glasses. A, 254
Stake and socket fractures in polyester fibres, 50
Steel design for chromizing, 701
Stiffness and modulus of elasticity of grey cast irons. The, 239
Strain gauge coefficient of resistivity of supported metallic films, 685
Structural and compositional variations in aluminium alloys rapidly quenched from the melt, 158
Structural relaxation by interphase boundary migration in pure tin, 653
Structural studies of cadmium films grown by hot wall epitaxy (HWE) technique, 764
Study of the role of vacancies in cyclic creep. A, 688
Surface variations in chemical composition of titanium disulphide single crystals, 457
Synchrotron X-ray section topography for thick single crystals, 111
Synthesis of a new ramsdellite-like phase of approximate composition $Li_2MgSn_3O_8$, 451
Synthesis of $Na_4ZrP_3O_{12}$ and unit cell data, 680

TEM–electron energy loss spectroscope study of the diamond particles prepared by the chemical vapour deposition from methane, 532
Temperature dependence of the size effect in thin chromium and tin films, 379
Temperature of phase dissolution in real crystals. On the, 213
Thermal contact under a diamond indenter, 413
Thermal expansion of yttrium vanadate, 139
Thermal stability of metallic glasses: long term crystallization behaviour, unexpected inversions and a proposal for standardization, 796
Thermal stability of new rare earth thallates, $M^{III}T^{III}O_3$ (M = La, Nd), 546
Thermal stresses and viscoelastic relaxation in metallic glasses prepared by liquid quenching, 516
Thermochromism in borate glasses containing bismuth oxide, 677
Thermoluminescence in borate glass containing copper, 437
Thinning of InP by chemical etching, 447
TiAl single crystals obtained by floating zone technique, 641
Topographic study of pits formed by indentation and etching, 811
Transmission electron microscopic observations of deformation and microtwinning in a synthetic diamond compact, 785
Transport in amorphous C_xSi_{1-x} alloys prepared by co-evaporation technique, 357

Unit cell parameters for a new crystalline polymorph of lead phthalocyanine and for two polymorphs of magnesium phthalocyanine, 85
Universal fatigue curves of ceramics using indentation flaws, 683
Unusual magnetic behaviour of light rare earth vanadates at higher temperature, 371
Unusual magnetic behaviour of heavy rare earth vanadates at higher temperature, 744
Use of power beds in the nitridation and subsequent densification of RBSN. On the, 236

Validity of approximations to Fuchs–Sondheimer theory in the case of thin films, 612
Vapour phase growth of vanadium-doped SnO_2 needle crystals, 741
Variation of hardness in Lucas Syalon ceramics. The, 345
Void formation during ductile fracture of overaged copper–cobalt alloys, 756

X-ray and electron diffraction analysis of GaSe crystals, 471
X-ray determination of the thermal expansion of Ti_3Au, 166
X-ray diffraction quantitative analysis of the Heusler alloy $Cu_{2.00}Mn_{1.00}Al_{1.00}$ annealed at temperatures between 423 and 973 K, 141
X-ray topographic assessment of flux grown BaFCl crystals, 314
